Dear all,

Attached are the files containing the information and evaluation letters.

Regretfully, both the letters say each in its way that the application was below the threshold for funding.

As you can see in the evaluation form, the application is not too bad. There are quite a few drawbacks in it, which means we can enhance the bid and give it another go.

As an applicant, we at HVL shall make an analysis of the evaluation and make a decision about the future application. The thing is the next deadline for applications is very soon from now (8 June 2023). Whilst the proposal preparation takes a huge lot of time and effort. Moreover, the major points in the application, e.g. activities, dates, target values, results, and the budget, need to be discussed by all the partners and continuous inputs are expected from all of us.

Anyway, we shall let you know very soon what the plans will be.

Looking forward to our further interaction.

Best regards,

Siarhei

Subject: Results of the CoVE applications will soon be available

Dear partners,

We all have recently a message from the EACEA Agency in Brussels. However, that was only a notification message informing us all about the fact that the results of the application are available on the EC website (the FTOP portal). It does not say whether or not the application has been chosen for funding.

I am not able to enter the information and evaluation letters inside the portal since the EC's servers are overloaded at the moment. However, I have seen that the information letter has a label called "rejection letter", which does not 100% say it was rejected - there might be mistakes in qualifying the types of letters. it happened in the past.

As soon as the access avails I shall see the exact decision about funding/non-funding of the bid we submitted in September last year and send out the evaluation letter to all the partners. If (most probably this will be the case) I shall also set up the first consortium meeting to discuss what we do next if we all decide that we do the next steps.

Could I kindly ask you for some more patience and wait until I send out the information and evaluation letters to you?

Best regards,

Siarhei

Subject: Happy Season

Dear partners of the H2VET project,

On behalf of the HVL and its team in the project I am sending you Season's greetings and wish you joyful festivities which you will share with all those who are close and dear to you. Have a Merry Christmas and a Happy and peaceful New Year!

Best wishes,

Siarhei and the whole HVL team

Merry Christmas!

Thank you for our fruitful meetings and inspiring co-operation during the past year. We look forward to continuing our good work together and wish you a Merry Christmas and a Happy New Year

Subject: H2VET Project proposal submitted

Dear partners,

This is to inform you that we have successfully prepared and submitted an application for a CoVE project (HYDROGEN Vocational Excellence Centre - Proposal ID: 101104793 (internal reference number: SEP-210870421) Call: ERASMUS-EDU-2022-PEX-COVE) H2VET. We congratulate you all on this and thank you very much for all the work you had been doing, all your time and effort, queries and doubts, contributions you had invested into it! That was a pleasure working with all of you during the time of the proposal preparation and we are sure it will be great working together again once the project gets funded by the EU (this call or the next one - hopefully this one - fingers crossed!) already as a big team.

According to the EACEA Agency's rules, the evaluation will take roughly 5 months from the date of submission but can be more. Anyway, as soon as we get news from the Agency we shall notify all of you.

Thank you all again and all the best in your regular work and other projects!

Stay in touch!

Best regards,

Siarhei and the HVL team
