Geležinio vilko 16, Vilnius, 03163

17.04.2020 nr 19-2/VP-18-0141

Confirmation Letter

We hereby confirm that the 5 Webcams were purchased for the dissemination event to be carried out in project 2018-1-LT01-KA202-047069 "E-tool for car mechanics professional competences assessment in the context of the EU experience". The computers used by Tartu VEC and our teachers are PC-s, not laptops and do not have web cameras built nor supplied as a standard part of hardware.

In order for the school to carry out a Virtual Multiplier event of the project "E-tool for car mechanics professional competences assessment in the context of the EU experience" on 24th March 2020 it was therefore necessary to purchase web cameras for the teachers involved. 5 cameras were purchased as the school buildings are closed due to COVID-19 outbreak and teachers are working from home offices in isolation, therefore not being able to share equipment.

Yours sincerely

(allkirjastatud digitaalselt)

Andrei Atškasov
